

USB MicroSD / M2  
Card Reader

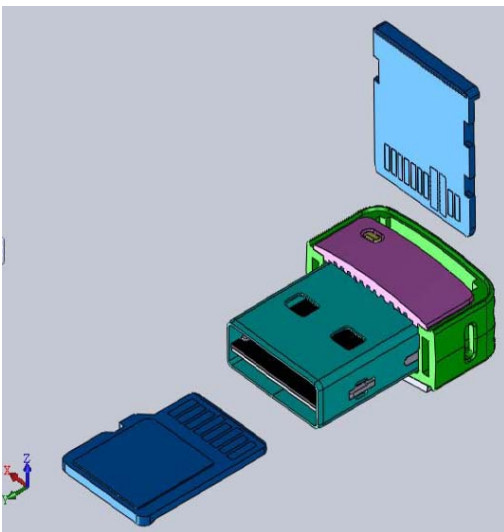

## User Manual

(DA-70317)

Thanks for buying the Micro SD/ M2 card reader with SDHC support. The drivers are integrated under Windows 2000/ME/XP/Vista/ Windows 7/MAC OS 9X..

How to use the card reader?

1. Open the cap and insert the card as sketch drawing.  
Micro SD card in the USB head; insert M2 card vertical.
2. Connect the card reader to USB Port. The unit can be installed automatically.
3. When removing the card, just push the switch, the card will come out easily.

**Caution:**

***Make sure the data transfer has ended before removing the memory card from card reader.***

\* When the card reader doesn't appear as a device in the explorer, remove the device from USB Port and insert the unit again, it will re-detect again.

If it still not works, please contact to the seller or technical support.
