Installing the Hardware

1. When Windows has completely loaded, insert the USB type A plug of the camera to your USB 2.0 port.

- 2. The camera comes with 6 white lamps, 3 on each side of the lens to assist in lighting the subject. These will light up if the subject or area is too dark.
- 3. Clamp the camera to your Notebook LCD panel or use the clamp as a stand to upright the camera.
- 4. Once Windows detect the USB insertion, it will prompt for a driver source search.
- The Wizard will then prompt for automatic installation or specify a source location. Select the first option "Install the software automatically". Click on "Next" button to proceed.

 The installation will then assign the drivers to the newly inserted camera.

The wizard has finished installing the software for VGA SoC PC-Camer@

Click Finish to close the wizard.

Finish

7. Next and last, click on the "Finish" button to end the installation.

 Plug the audio pin for microphone function for standard PC 99 pink jack

Note: The webcam driver will automatically recognize the initial installed USB port. If user plug into another

USB port and the windows will prompt for a driver source search again.

Check followings for correct installation:

- 1. Confirm USB interface in PC;
- 2.
- Check the USB interface and see if it is working well; Check method: Click on "Control panel" → "System" → "Hardware" button → "Device manager" 3.
- tab, check the "Universal serial bus controllers" list if it exist, and whether it works normal.
- 4. Ensure there are no red or yellow icons in front of each USB controller list.
- 5. Next, check if Windows have detected and install the camera correctly. Go to the Imaging Device list and see if "VGA SoC PC-Camer@" line appears in it. If it does then installation is successful.

Using the Camera: Note: The driver and software must be installed first, and then connect as following. 1. Double click on VP-Eye icon on the desktop, and the preview image will appear in the main

The VP-Eye software contains many functions and these are available from the main VP-Eye screen. 2.

- 3. Adjust the lens to focus the subject till it is sharp.
- 4. 5. The camera is ready for use. The VP-Eye have many built-in imaging applications such as Video-Mail, Netmeeting, Card Maker, Video Monitor, Album Maker, Special effects, Image manager, and Video Games.

6. To Setup the camera features, select the Circle icon at the top right menu bar.
