## V. Driver Installation

Under system Windows 7/ Vista/ XP/2000, system will automatically detect the new hardware and

finish the setup! Then an  icon will appear on the right-bottom area of the system toolbar as below:

Congratulations to enjoy this product now!

## VI. Power Supply: BUS-Power

Usually under USB 3.0 Bus-power mode, the device can work normally; if your device connects to one USB3.0 PCI-E card or USB3.0 Express card, and it can't work normally, then you need to input additional power to the PCI-e or Express card to supply the power.

## VII. Remove the external enclosure

Before removing this unit from your computer, please finish the following procedures for a safe removal:

- 1). Click the  icon in the **[Desktop]** window of your computer
- 2). A **[Safely Remove Hardware]** message window will appear, click the **[Stop]** button
- 3). **It is now safe to remove the USB device]** message will appear, close the [Safely Remove Hardware] window
- 4). Remove (Power off) the USB extended power jack if it is applied.

Now you can safely remove the enclosure!

## VIII. Format a new Hard Disk Drive

If you use a new Hard Disk Drive, you must format it before you use it.

Please follow the steps as bellow to format your new Hard Disk Drive:

- 1). Right click [My Computer], and select **[Manager]**
- 2). System will display a "Computer Manager" window, and click **[Disk Manager]** in left window
- 3). In right window, the message of the new Hard Disk Drive will appear under the system disk, such as [Seagate....]
- 4). Right click the new disk drive, and select **[Delete partition]**
- 5). Right click the new disk drive, select **[New Partition]**
- 6). Right click the new disk drive, select **[New logical drive]**
- 7). Right click the new disk drive, select **[Format disk drive]**
- 8). Now you have formatted the new disk drive, then in **[My Computer]**, the new Hard Disk Drive will appear and you can use it.
