## FAQ

Q1:  Does the sharing switch support USB 1.1 and 2.0 devices?
A:  The sharing switch can work and comply with USB 1.1 and 2.0.

Q2:  Does the sharing switch need power supply?
A:  No, the sharing switch is designed for non-powered switch.
It shares with computer power when you connect to the computer.

Q3:  What operating system will the sharing switch work with?
A:  The sharing switch can support Windows 7, Vista, XP, 2000 and
Mac OS x (10.3 and higher).

## TROUBLESHOOTING

1. The switching function does not detect my computer.
   - make sure that the cable between the sharing switch and
     the computer is completely connected.
   - Try to connect the computer to a different USB port.
2. The USB device is not working properly.
   - Please unplug and plug-in again to activate the device.
