Driver Installation

Important: If your system doesn't boot to Windows properly with our card installed, check with your system's manufacturer for the latest system firmware update.

For Windows® XP/Vista/7 (32/64 bit)

Place the installation CD into a CD-ROM drive and setup should launch automatically. If setup does not launch, use Windows Explorer to native to the appropriate CD-ROM driver and run the installation program.

Follow the instructions on screen to install the driver. After driver installation is complete, you must restart your computer.

To Verify Driver Installation

- 1. Right click My Computer, then click Manage. Click Device Manager.
- 2. Double click Universal Serial Bus controllers option.
