

6-way Power Strip with Wireless Foot Switch

Manual 84277

INSTALLATION INSTRUCTIONS

1. Open the battery compartment of the remote control transmitter and insert the battery provided ensuring that it is positioned correctly.
2. Plug the power strip into a mains power outlet. Press and hold the *function* button on the power strip until the light starts flashing.
3. Press the button on the remote control transmitter. The light on the power strip will flash quickly and then turn off to indicate that the remote control transmitter and power strip have been paired.

Once paired, simply press the button on the remote control transmitter to switch on and off the remote controlled power outlets.

Alternatively, a single short press of the function button on the power strip will also switch on and off the controlled power outlets.

RESET INSTRUCTIONS

The power strip can be unpaired from all remote control transmitters by pressing and holding the *function* button on the power strip. The light on the power strip will begin to flash slowly. Continue to hold the function button until the light begins to flash quickly. Refer to installation instructions above to pair a remote control transmitter with the power board.
